Native American Unique GMAT Examinees

Population and Geography

Native Americans, with 829 unique GMAT examinees in TY2010, are the smallest underrepresented US population group in the business school pipeline*.

- Native Americans account for five percent of the underrepresented US populations among GMAT examinees, and make up nearly one percent of all US unique GMAT examinees.
- Among Native American unique GMAT examinees, men outnumber women by 18 percent (approximately 59% men vs. 41% women).
- The representation of women Native Americans is greater, however, when compared with all other unique US GMAT examinees (non-underrepresented population), where women represent only 38 percent of GMAT examinees.
- The majority of Native American unique GMAT examinees are 30 years of age or younger (73%). Within this age range, Native Americans between the ages of 25 and 30 are the largest age cohort, and outnumber those younger than 25 (45% vs. 28%).
- By region, the West has the largest percentage of unique Native American GMAT examinees, nearly 34 percent; Other US regions with large representation of Native Americans are the Southwest (22.8%) and the Midwest (12.8%).

Native American Unique GMAT Examinees by US Region, TY2010

*Note: Data are presented by unique GMAT examinees for Testing Year 2010, the period from July 1, 2009, to June 30, 2010. Native American in this analysis includes American Indian and Alaska Native population groups. Underrepresented populations in this analysis refer to African American, American Indian, Alaska Native, Pacific Islander and other Native American, as well as Hispanic American populations (including Mexican American, Puerto Rican, and other Hispanic American groups).

Work Experience

The vast majority of Native American unique GMAT examinees have some work experience (87%), and the most often reported level of work experience was between four and nine years in TY2010.

- Native Americans have a similar percentage of unique GMAT examinees with no work experience (13.1% reported zero years) when compared with other underrepresented US population groups, 14 percent for African Americans and 15 percent for Hispanics. This is less than the percentage of all other unique US GMAT examinees (non-underrepresented population) with no work experience, at 21 percent.

Years of Work Experience Reported by Unique GMAT Examinees, TY2010		
Years of Work Experience	Native Americans	US Citizen Non-Underrepresented Population
Zero Years	13.1%	20.7%
1–3 Years	32.1%	34.3%
4–9 Years	34.0%	31.4%
10+ Years	20.8%	13.6%
Total	100%	100%

US citizen classification does not include figures for other underrepresented groups such as African American or Hispanic populations. GMAT Testing Year refers to July 1, 2009, to June 30, 2010.
