### Current importance of AI skills

Most employers are not too concerned about AI for today's GME grads, but its importance is expected to grow—and soon.

**26%**

of corporate recruiters say AI skills are currently important to GME graduates

**35%**

of corporate recruiters in the technology sector say AI skills are currently important to GME graduates

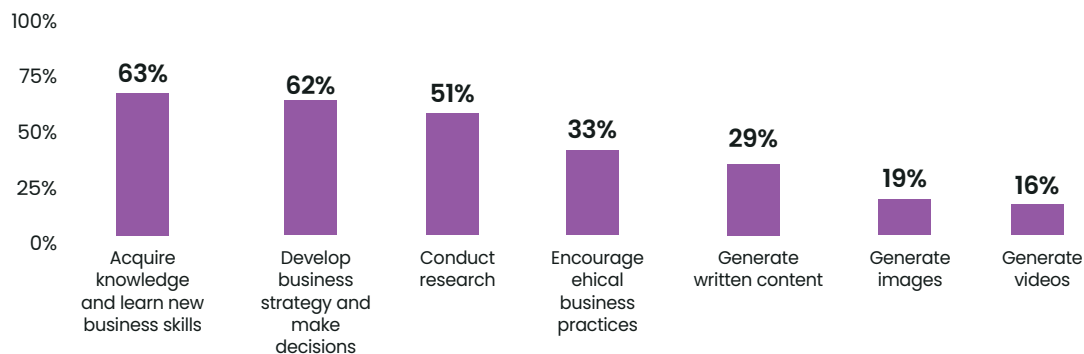

**49%**

of corporate recruiters in Central & South Asia say AI skills are currently important to GME graduates

### How GME grads should use AI

AI-concerned employers want GME graduates to use AI as a strategic partner in learning and strategy—not as a source for more and faster content.

#### How corporate recruiters want GME graduates to be able to use AI

### Future importance of AI skills

Global employers rank AI 4th in the skills that will be most important in the next five years behind strategic thinking, problem-solving, and technology/IT skills.

#### Rank of AI's importance across industries:
